## Video of the Month: Qualys In Post-Mythos Era

### From Noise to Action in Hours

In the post-Mythos era, Qualys detects threats within 6 hours, cuts 62.5 million findings to 60,000 actionable items, and deploys patches autonomously, with zero human involvement.

[Watch the video here.](#)

## Two Leaders, One Sharp Conversation

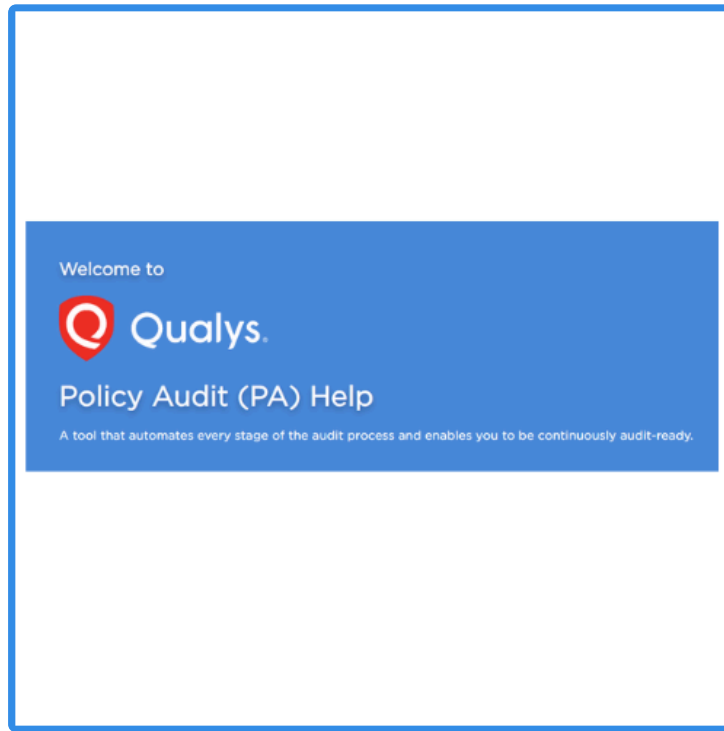

### Pressure, Priorities, and Cyber Risk

Qualys CEO Sumedh Thakar joins former England cricket captain Michael Vaughan to discuss how leaders prioritize under pressure, in cricket and cybersecurity.

[Watch this fascinating conversation here.](#)

## Content Enhancements

This month, we have created three new product landing pages that provide product overviews, key features, and workflows, making them the perfect starting point for users.

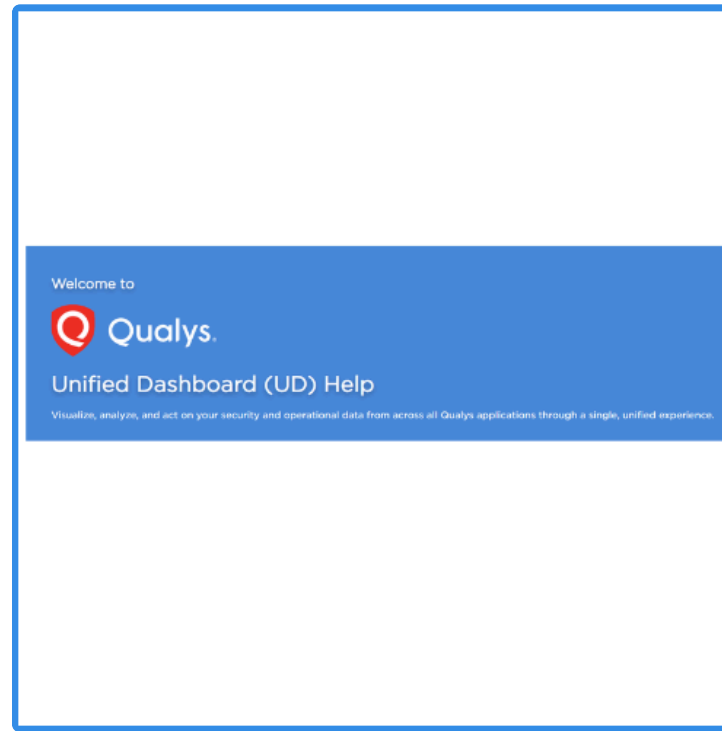

### Policy Audit Landing Page

Stay continuously audit-ready with Policy Audit.

Automate evidence collection, monitor compliance posture, and remediate failed controls across operating systems, databases, and applications at scale.

[Explore More](#)

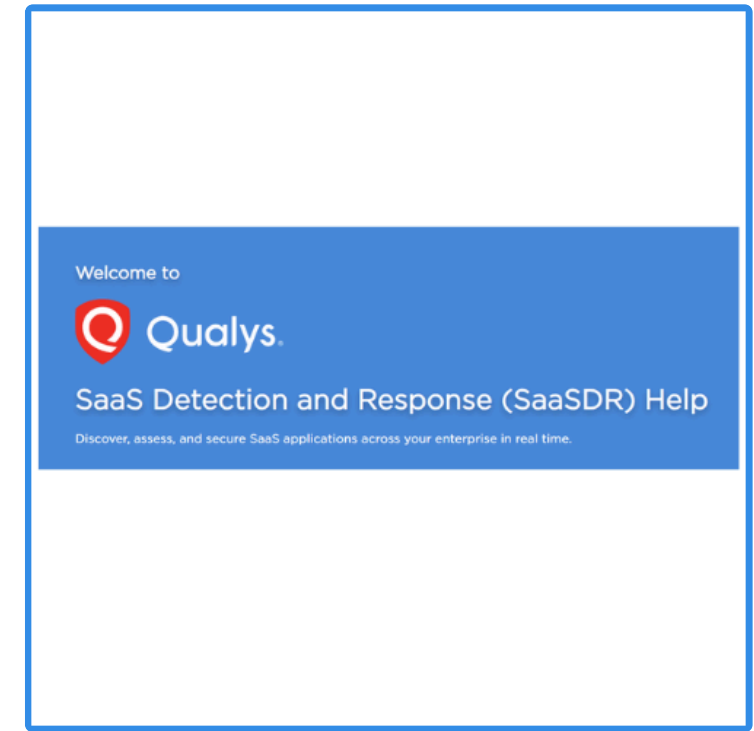

### UD Landing Page

Unified Dashboard centralizes data from all Qualys applications for visualization and analysis.

Monitor trends, build custom widgets & dashboards, and improve decision-making from a single platform.

[Explore More](#)

### SaaS DR Landing Page

Qualys SaaS Detection and Response delivers continuous SaaS visibility across applications.

It detects shadow IT, reduces identity risks, and provides unified remediation insights guidance.

Check our updated [What's New](#) page featuring 17 newly added terms on the [Glossary page](#), new landing pages, product resources, newsletters, & more, all in one place!

## Qualys Threat Research Updates

May 2026

This Month's Update

**12** Vulnerabilities exploited in the wild

**20** Cloud misconfiguration risk exposure

**CVE-2026-46333: Linux Kernel Local Root Privilege Escalation Vulnerability**

**Threat Research Newsletter**

Stay informed to keep your systems secure and resilient

The graphic is a blue-themed newsletter header. On the left, it says 'May 2026' and 'Threat Research Newsletter' in large white font, with a sub-headline 'Stay informed to keep your systems secure and resilient'. On the right, under 'This Month's Update', there are three white boxes: the first contains '12 Vulnerabilities exploited in the wild', the second contains '20 Cloud misconfiguration risk exposure', and the third contains 'CVE-2026-46333: Linux Kernel Local Root Privilege Escalation Vulnerability'.

May: Threat Research Updates

## Watch Video: Patch Tuesday May

### Vulnerabilities, Priorities & Fixes

May's top vulnerabilities analyzed: Detection, prioritization, and remediation strategies from Qualys TRU experts.
